A license is required to export regulated items, but there are important exemptions for research and teaching activities at universities. The regulation and licensing requirements depend on what is being exported, where it is going, who will receive the export, and how it will be used. UTHealth Houston and its faculty, staff and trainees must comply with these regulations.

The individuals listed on this page can assist you in answering any questions you may have about how the regulations apply to your research, if a license is required, or how to obtain a license.

RESEARCH SUPPORT SOURCES OF INFORMATION

1. Department colleagues, administrators, DMOs and Associate Deans for Management may be good first resources.
2. Each UTHealth Houston school has an Associate Dean for Research (*see slide 4*).
3. University leaders indicated in this brochure may always be contacted for support and information.
4. If you experience difficulty finding information, please feel free to contact the [Office of Research Affairs](#) at research@uth.tmc.edu

Our Collective Goal

To support UTHealth Houston's research activities and its researchers by providing a safe, ethical and responsible environment for the conduct of research.
